EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sumedha A. Bahri on May23, 2006.

The application has been amended as follows:

Claims 1, 2 and 38-40 are cancelled.

Election/Restrictions

Claim 3 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 7, 8 and 10-13, directed to the species of a non-elected species no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 3-16 and 41-43 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6,293,960 B1 discloses a catheter system capable of being inserted within the intestines and having an atraumatic element capable being releasable within the intestines, the element is inflatable and is spherically shaped.

US 6,755,869 B2 discloses a catheter system having an atraumatic element (26) that is capable of being external to the catheter during passage within the intestines. As shown in Figure 4, the pusher (40) can be moved a couple is millimeters to the front and part of element 26 is capable of being outside of the catheter during the deployment.

US Pub. 2005/0060017 A1 discloses a catheter system having an atraumatic element (20) that is capable of being external during the deployment of the implant.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J. Stewart whose telephone number is 571-272-4760. The examiner can normally be reached on Monday-Friday 7:00AM-5:30PM(1 Friday B-week off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on 571-272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
